

## **NDC-in-a-Box Implementation for Mongolian NDC**

Installation and implementation of the Extended NDC in a Box for Mongolian NDC was completed successfully. Using new features in Extended NDC in a Box we have following benefits (DTK-GPMCC, DTK-DIVA and DTK-Jade) for advanced research for seismic and infrasound network. It also provides new tools (Web-grape(ATM), Norfy and OpenSpectra) are ready for processing, visualizing and analyzing radionuclide data.
