

, conformity assessment and certification

Tuesday, 20 June 2023 17:30 (30 minutes)

The need for common understanding and adoption of good practices and measurable ways to ensure safety and security in the development and deployment of different technologies are some of the “Raisons d’être” of standardization and certification. This presentation aims to create awareness about standardization, some areas of relevance for the CTBT, while encouraging dialogue with regards to standardization and certification gaps and needs.
