

NDC Argentina: First year of Operation and Radionuclide Data Analysis

Wednesday, June 21, 2023 1:30 PM (15 minutes)

The aim of this presentation is to share experiences and lessons learned from our first year of operation. From build-up and establishment challenges, data products and reports, detection levels trends and data comparison between the International Data Centre (IDC) and the National Data Centre for testing and capacity building purposes for analysis. Three radionuclide stations from Argentina plus one from Chile are being monitored on a daily basis using the tools provided by IDC for CTBTO relevant radionuclide detection in the region.
