

monitoring in Kenya: Potential applications for Scientific and Civil application

Tuesday, 5 November 2024 16:20 (10 minutes)

Kenya is host to infrasound Station IS32 in Kenya. Infrasonic waves can be used for various purposes which include mining, control of deforestation, documentation of climate change issues such as heavy rains, high temperatures, and even human-wildlife conflict issues. This presentation gives results of the use of infrasound technology for these varied applications.
