

Detecting Seismoacoustic Events in the Arctic Ocean

Niklasson, S. M., Rowe, C. A., Veneziani, M., Roberts, A. F., Gibson, G. A., Bilek, S. L Los Alamos National Laboratory, New Mexico Tech

P1.3-405

Sea ice concentration and other factors control seasonal sound patterns in the Arctic Ocean

• See our poster to find out how changing environmental and anthropogenic noise impacts hydroacoustic event detection

This Ground-based Nuclear Detonation Detection (GNDD) research was funded by the National Nuclear Security Administration, Defense Nuclear Nonproliferation Research and Development (NNSA DNN R&D) and the Nuclear Testing Limitations (NTL) Program in the NNA Office of Nuclear Verification (NA-243) and LANL Laboratory Directed Research & Development (LDRD).
