University of Nairobi, Department of Earth and Climate Sciences, Nairobi, Kenya  
Ministry of Education, Science and Technology, Dodoma, Tanzania

P2.1-238

- This poster presents the results of NPE2024 exercise scenario and characterization of a potentially CTBT relevant event at KE-NDC
- Scenario: Andlantis suspicious that Bezores violated the CTBT and requested for ETA
- We used methodology presented during SnT2023 (Mulwa and Dindi, 2023) and published in Pure and Applied Geophysics Journal (see Mulwa, 2024 in PAGEOPH, <https://doi.org/10.1007/s00024-024-03458-4>).
- Our results demonstrate non-violation of the Treaty by Bezores.
