

Atalay Ayele, Sisay Alemayehu and Birhanu Abera

Institute of Geophysics Space Science and Astronomy, Addis Ababa University, Addis Ababa, Ethiopia

P2.2-624

- Come over to see our poster if you would like to know more about:
- Fentale – Dofen volcanic activity in the Main Ethiopian Rift (MER)
  - ❖ The volcanoes as a natural lab to study active continental rifting
  - ❖ The volcano sources as a potential source for ground truth events
- Major challenges in volcano monitoring
  - sparse station distribution
  - Limited real-time seismic stations
  - Manual data analysis
- Lessons learnt for Disaster Risk Management (DRM)
