

H. Al Hamrashdi¹, F. Al Ma'mari¹ and Rachid Sabiaa¹

¹ Sultan Qaboos University

- 
- Our poster is about mapping NORM and background radiation in Oman.
 - I am going to tell you why mapping NORM and background is important especially at this point in history.
 - What we did so far is creating a grid map, started collecting and preparing the samples and managed to get few results as well.
 - The most important result of our work is the baseline created for background radiation in the Sultanate.
 - If you want to find out more, come over for a chat in front of our poster: **P2.3-021**
