Swedish Defence Research Agency (FOI)

P3.2-237

- Our poster is about uncertainties in calibrations of Xenon measurements.
- I am going to tell you about the importance of proper treating of uncertainties.

- And how we propose to update the calibration and analysis procedures to do just that.
- The most important result of our work is that:
  - We have fixed it. 😊
  - Correlation or covariance data is needed in the message format. !
- If you want to find out more, come over for a chat in front of our poster.
