

Mauro Núñez¹, Román Pino¹, Andrés Zapata¹, Paola García Peña², Luis Manríquez López³, Ricardo Sagarzazu¹, Gaspar Terrado¹ and Eduardo Nassif¹

¹ INVAP SAU.– San Carlos de Bariloche – ARGENTINA; ² CCHEN – CTBTO; ³ CCHEN-RECH 1 RR (CCHEN - Comisión Chilena de Energía Nuclear La Reina - Santiago de Chile – CHILE)

A new noble gas monitoring system joins STAX project equipment family:

- **INVAP STAX system will be installed soon at RECH-1 (the RR at La Reina in Santiago, CHILE, (CCHEN).**
- **2nd STAX Unit in South-America.**

Main Features:

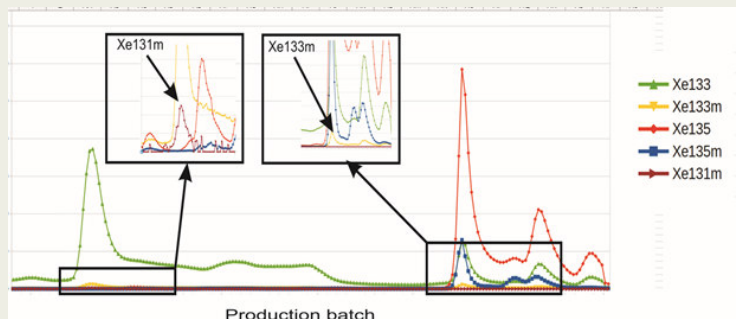

- Compact design/ reduced deployment area/requirements
- Easier Maintenance (2 way access to key hardware components)
- Low weight
- Simple configuration/Friendly User Interface
- Low dilution regime measurement capabilities

**IF YOU WANT TO
FIND OUT MORE
come over to see
our E-Poster:**

- **Wednesday,
September 10th**
- **11 am**
- **Zeremoniensaal**

Typical production run emission timeline (see below)

NOTE: In case of RR's the dominant noble gas isotope is ⁴¹Ar.
