- Come and see our poster which provides information about the analysis on the effect of mining activities around the site KAPI (AS044) based on waveform power spectral density.
- Why this topic is important to discuss ?
 - Similar activities may occurs in other areas in the world.
 - If this activity is allowed to continue, it can disrupt monitoring and signal quality.
- The most important result of our work :
 - How it affects the noise level ?
 - What is the follow-up ?
- If you want to find out more, please feel free to chat and discuss in front of our poster.
