

D. Brown (retired, formerly CTBTO)

P3.5-611

- Come over to see my poster if you would like to find out more about:
  - Infrasound source location at IMS stations
  - The Neighbourhood Algorithm
    - does not require determining derivatives of travel-time curves, or inversion of over-determined matrices
    - used to minimize a misfit function
    - three significant events are analysed including:

Australia: explosion of mining truck carrying ANFO
