P4.2-730

- Our poster is about ongoing recapitalization activities performed both at primary and auxiliary seismic stations
- Providing engineering solutions to support the IMS network is our daily task
- Uninterrupted, high-level performance and adequate sustainment of the IMS network ensures continuous and efficient operations
- Here we show some progress of the ongoing works at the stations PS40, PS34 and AS57
- To find out more please visit P4.2-730
