

Mr. ALZOUBI, Shadi  
Jordan Seismological Observatory (JSO)

P4.2-236

- Our poster is about The Replacement and upgrade of the ASF056 by a donation from UE.
- I am going to tell you why this important and how it result in making ASF056 contributing station to the IMS network.
- And what we did about the Faulty and outdated sensor, what done change and upgrade the station and what done to recertification the station again to recontribute to IMS network.
- The most important result of our work is the success of removing faulty and stuck old borehole sensor after several tries and this allow us to install new borehole sensor.
- If you want to find out more, come over for a chat in front of our poster.
