

Anton Mironiuc
Comprehensive Nuclear-Test-Ban Treaty Organization (CTBTO)

P4.5-544

Discover how the OSI Communications System:

- Provides the inspection team with secure voice and data functionality anywhere in the world within six days
- Supports inspection areas up to 1,000 km² with redundant multi-layer networks
- Combines satellite broadband, UHF/VHF/HF, and Iridium phones for resilience
- Is being field-tested for IFE26 Namibia to ensure inspector safety and operational continuity
