

Andrew Bramnik and Simon Summers
Comprehensive Nuclear-Test-Ban Treaty Organization (CTBTO)

P4.5-564

- The **On-Site Inspection (OSI) Directed Exercises (DEs) 2023** were the first field exercises conducted under the framework of the OSI exercise programme for 2022-2025, and the **first field exercises conducted since the Integrated Field Exercise in 2014**.
- 78 individuals participated in three simultaneous Directed Exercises from 3 to 28 September 2023, comprising activities on Field Operations Support for an OSI, Environmental Sampling and OSI Field Laboratory, and OSI Data Flow Management.
- Learn how these exercises served as training platforms to facilitate the seamless interoperability of selected OSI capabilities during a subsequent Build-Up Exercise in 2024 (BUE24) and the next Integrated Field Exercise in 2026.
