

Marcelo A. Fernández – OSI 3TC Health and Safety Officer
ARGENTINA

P4.5-112

I would like to cordially invite you to my E-poster presentation titled "**On Site Inspection: New approach to contamination control in the Field and at Base of operation.**"

The aim of this presentation is to share some new concepts for OSI contamination control like scenario categorization and decontamination procedures.

It would be a great honor to have you attend and to discuss this relevant topic.

I look forward to seeing you there.

Marcelo A. Fernández

OSI 3TC Health and Safety Officer
