CTBT: SCIENCE AND TECHNOLOGY CONFERENCE
8 SEPTEMBER ONLINE DAY
9 TO 12 SEPTEMBER AT HOFBURG PALACE, VIENNA & ONLINE

LIGHTNING TALK

P4.5-291

A realistic ISP as a required OSI integrated exercises participant for the application of the ITF

Luis Gaya-Pique[1], Nalin de Silva[2] and Peter Labak[1]
[1]CTBTO Preparatory Commission; [2]Geological Survey and Mines Bureau (GSMB), Sri Lanka

A realistic inspected State Party (ISP) component is key for on-site inspection (OSI) integrated exercises. Scenarios shall exercise what an ISP may be required to provide in the case of hosting an OSI and what is the ISP impact on the conduct of the inspection.

How is the implementation of the Inspection Team Functionality (ITF) influenced by the ISP strategy, e.g. when:

- Providing differing plausible explanations of the triggering event for the BUE24 scenario?

- Using the ISP national implementation requirements concerning private property?

- Providing equipment for use by the Inspection Team?

HOW DID THAT WORK DURING THE BUE24 EXERCISE?
