

M.B.C. Brandt and T. Makhateng
Council for Geoscience, Pretoria, South Africa

P5.1-001

- Come over to see our poster if you would like to find out more about:
- Infrasound waves recorded at station I47
 - the national seismograph network locates earthquakes, mining-related events and suspected explosions
 - open cast mine blasts are confirmed as explosions with infrasound wave analysis
- Seasonal distribution
 - May and June 2024 blasts mostly recorded from the west
 - January and February 2025 blasts mostly recorded from the east
