

Alcides Caballero & Moisés Gadea

Facultad de Ciencias Exactas y Naturales – Universidad Nacional de Asunción

P5.2-012

- Our poster presents the successful installation of advanced monitoring technologies and the subsequent data recording processes. Following a significant software and station upgrade, our focus shifted to in-depth data analysis, marking the formal commencement of our research phase.
- Training provided by the CTBTO was instrumental, enabling us to exceed our initial technical limitations and expand our analytical capabilities.
- Key outcomes of our project include the publication of our findings in regional scientific journals and the strengthening of collaborative relationships with a global network of researchers.
- We invite you to visit our poster to learn more and discuss our work.
