P5.3-482

- Our poster is about the CTBTO mentoring program for early-career women in STEM from Indonesia.
- I am going to tell you how the CTBTO-CYG Mentoring Program can give significant impact for supporting women in STEM especially for capacity building and career development.
- And what we did about it was conduct a Key Performance Indicator-based survey to evaluate the program's impact.
- The most important result of our work is that the program significantly improved skills, confidence, and networks, strengthening Indonesia's role in CTBTO initiatives.
- Find out more details at board 42 during P5.3 session on 12 September at 11.00
