P5.3-393

- Our research is dedicated to Science and Technology Conferences that serve primarily as an instrument for continuous review of scientific and technological advances relevant to the CTBT, but in fact play a much bigger role.
- Come over to see our poster if you are interested to find out more about how the SnT conferences evolved over years since their inception in 2006 in terms of participation dynamics, scientific scope, as well as international coverage and outreach.
- Based on the results of our analysis, we have identified challenges & gaps that the SnT faces, and to demonstrate the potential of this platform, we have provided recommendations for further development.
