

ID: Pa06

Type: Panel

, Gender, Generations: How NDCs Shape the World Today and Tomorrow?

This panel will focus on strengthening the National Data Centre (NDC) community through sharing experience and collaboration at multiple levels: at the national level, it will highlight internal coordination among institutions, showcase successful national collaborations, and share best practices and lessons learned within individual NDCs; at a regional level, the panel will explore mechanisms for knowledge transfer and collaboration among NDCs, emphasizing peer learning and mutual support within and across regions; and at a global level, the panel will mention strategies to inspire and support emerging NDCs worldwide. It will also feature the NDCs4All initiative, illustrating how global partnerships and inclusive approaches can accelerate progress and help NDCs collectively contribute to broader CTBTO goals.
