Data Centre Preparedness Exercise (NPE) 2019 - Scenario Design and Expert Technical Analysis

Wednesday, 30 June 2021 15:04 (15 minutes)

NDC Preparedness Exercises (NPE) are an opportunity to practice the verification procedures for the detection of nuclear explosions in the framework of CTBT monitoring. The NPE 2019 scenario was developed in close cooperation between the Italian NDC-RN (ENEA) and the German NDC (BGR). The fictitious state RAETIA announced a reactor incident with release of unspecified radionuclides into the atmosphere. Simulated concentrations of particulate and noble gas isotopes at IMS stations were given to the participants. The task was to check the consistency with the announcement and to search for waveform events in the potential source region of the radioisotopes.

During NPE2019 an Exercise Expert Technical Analysis was requested from the IDC for the first time. A fictitious state party provided within the scenario (simulated) national measurements of radionuclides and asked for assistance in analysing the additional samples. Especially backward ATM and the search for seismic events in the possible source region was requested. In addition the overall consistency to a scenario event, a reactor incident declared by the fictitious state Raetia was questioned. In the third and last stage of the exercise, national regional seismic data were distributed among the participants which contained an anomaly pointing to an explosive event.

Promotional text

NPE feature monitoring expertise with scenarios of partially simulated CTBT relevant events. Highlights of NPE 2019: integration of multiple RN sources, ETA request, and synthetically manipulated seismic data.

Primary authors: Mr ROSS, J. Ole (Federal Institute for Geosciences and Natural Resources (BGR), Hannover, Germany); Mr OTTAVIANO, Giuseppe (Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA), Italy); Ms RIZZO, Antonietta (Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA), Italy); Mr GAEBLER, Peter (Federal Institute for Geosciences and Natural Resources (BGR), Hannover, Germany); Mr GESTERMANN, Nicolai (Federal Institute for Geosciences and Natural Resources (BGR), Hannover, Germany); Mr CERANNA, Lars (Federal Institute for Geosciences and Natural Resources (BGR), Hannover, Germany)

Presenter: Mr ROSS, J. Ole (Federal Institute for Geosciences and Natural Resources (BGR), Hannover, Germany)

Session Classification: T4.1 - Performance Evaluation and Modelling of the Full Verification System and its Components

Track Classification: Theme 4. Performance Evaluation and Optimization: T4.1 - Performance Evaluation and Modelling of the Full Verification System and its Components
